TIAGO MARQUES

SOFTWARE ENGINEER | CLOUD-NATIVE ENGINEERING | DEVSECOPS

Covilhã, Portugal Portuguese (Native) · English (B2) tiagomarques.work@protonmail.com LinkedIn GitHub

PROFILE

Software Engineer focused on cloud-native platforms and DevSecOps. At Capgemini Engineering, contribute to a national platform for Portugal's National Health Service, developing and integrating backend services using Java, Spring Boot and Apache Camel alongside messaging, Kubernetes, observability and secure delivery technologies.

PROFESSIONAL EXPERIENCE

Software Engineer | Capgemini Engineering

Feb 2023 — Present · Client project: SPMS, Portuguese National Health Service interoperability platform

- Develop backend integration services using Java, Spring Boot and Apache Camel.
- Work with HL7 v2 and FHIR standards, including message routing, transformation and orchestration.
- Contribute to messaging and system integration using RabbitMQ and relational databases.
- Designed and implemented most project CI/CD pipelines, defining stages that run code quality and security tools including SonarQube, Trivy, Kubesec, kube-score, Gitleaks and OWASP ZAP.
- Set up Argo CD and created Argo CD hooks; work with Docker, Kubernetes, Harbor and Nexus.
- Implement and integrate observability with OpenTelemetry, Grafana Tempo, Loki and Prometheus.
- Use HashiCorp Vault in secure delivery workflows.

Java Backend Developer Trainee | Capgemini Engineering

Nov 2022 — Feb 2023

Developed Java projects, including Spring Boot applications and microservice-based solutions. Worked with SQL, PostgreSQL, Kafka, ActiveMQ, Docker, Kubernetes, Jenkins, Archiva, Linux and Git.

TIAGO MARQUES

SOFTWARE ENGINEER

Covilhã, Portugal tiagomarques.work@protonmail.com LinkedIn GitHub

TECHNICAL SKILLS

Backend
Java, Spring Boot, Apache Camel; REST APIs, microservices, event-driven architectures

DevSecOps
SonarQube, Trivy, Kubesec, kube-score, Gitleaks, OWASP ZAP, HashiCorp Vault

Observability
OpenTelemetry, Prometheus, Grafana, Loki, Tempo

Health Data Standards
HL7 v2, FHIR

Cloud & CI/CD
Kubernetes, Docker, GitLab CI, GitHub Actions, Argo CD, Harbor, Nexus, Jenkins

Data & Messaging
Oracle, PostgreSQL, MySQL, RabbitMQ

General
Linux, Bash, Git, Maven; Agile/Kanban delivery and cross-functional collaboration

EDUCATION

Java Programming — UPskill
Instituto Politécnico de Castelo Branco · 2022

CERTIFICATIONS
